EDUCATION

Bachelor of Science in Computer Science (Co-op) September 2025 – Present

University of British Columbia, Vancouver, BC

- Relevant courses: CPSC 221: Basic Algorithms and Data Structures, CPSC 213: Introduction to Computer Systems, Math 302: Introduction to Probability

Associate Degree in Science in Computer Science January 2024 – June 2025

North Seattle College, Seattle, WA

- GPA 3.884, 4x President's List

High School Diploma September 2019 – June 2023

Gems Cambridge International School, Dubai, United Arab Emirates

EXPERIENCE

Math and Computer Science Tutor | North Seattle College | Seattle, WA January 2024 – June 2025

- Provided one-on-one tutoring in Calculus, Python, and Java, assisting students with assignments and reinforcing key concepts
- Led group tutoring sessions, fostering collaborative problem-solving in mathematics and programming
- Participated in training and staff meetings to stay updated on best tutoring practices

Content Writer Intern | InspiritVR | Remote November 2022 – December 2022

- Wrote high school biology study guides for general biology and CBSE biology curriculums
 - Wrote blogs offering study and revision tips, aimed at improving students' study habits and exam preparation
-

COURSES & PROJECTS

Prairie Journal March 2026

cmd-f Hackathon

- Chrome extension that detects wrong answers on PrairieLearn practice questions and prompts students to journal their reasoning and receive AI-generated feedback
- Saved entries organized by course and module on a personal dashboard, tracking wrong attempts across question variants and stored locally via Chrome storage.
- Built using JavaScript, HTML, and CSS | github.com/himageorge/prairie-journal

SpaceTraders Game December 2025–

- Terminal-based Python game built on the SpaceTraders REST API, where you control an agent in a shared universe, mining asteroids, trading goods, and fulfilling delivery contracts
 - Designed an event sourcing architecture with immutable event types using Pydantic, enabling full game state reconstruction from event replay
 - Built using Python, Pydantic, and SQLite | github.com/himageorge/SpaceTraders
-

TECHNICAL PROFICIENCIES

Languages and Tools: Python, Java, C, C++, JavaScript, Git, MongoDB, Node.js, SQLite
